

Internet Privacy Policy

Updated August 2024

To ensure ethical use of online data and to maintain internet privacy, the Virginia War Memorial Foundation (the Foundation) has adopted the following internet privacy policies:

Our registration forms require users to provide contact information that may include name, email address, format preference (HTML vs. text), address, and personal interests. We do not request or store sensitive information from our visitors, such as credit card information or social security numbers. Email and contact information collection is used exclusively for Foundation communication and marketing purposes, with ability to opt out. The Foundation will never retarget or share contact information with other organizations.

Internet Protocol Address: The Virginia War Memorial Foundation website does not collect or store IP addresses, however we may be able to see the locations of visitors to assist with metrics. An IP address is a number that is automatically assigned to your computer when you use the internet. IP addresses are not linked to personally identifiable information.

Use of "cookies" ("remember me?"): Web cookies are used for authenticating, tracking, and maintaining specific information about web users. Cookies can make surfing the internet easier by performing certain functions such as saving passwords and personal preferences regarding your use of a particular website. Many consider the use of cookies to be an industry standard. Your browser probably is set to accept cookies. However, if you prefer not to receive cookies, you can configure your browser to refuse cookies. If you set your browser to refuse cookies, it is possible that some areas of our website will not function properly.

Security: All sensitive information is transmitted using SSL (Secure Socket Layer) encryption. SSL is a proven coding system that lets your browser automatically encrypt, or scramble, data before you send it to us. We do not collect or store credit card information unless it is through our third-party payment systems, Square and Neon One CRM.
